

# Rademaker

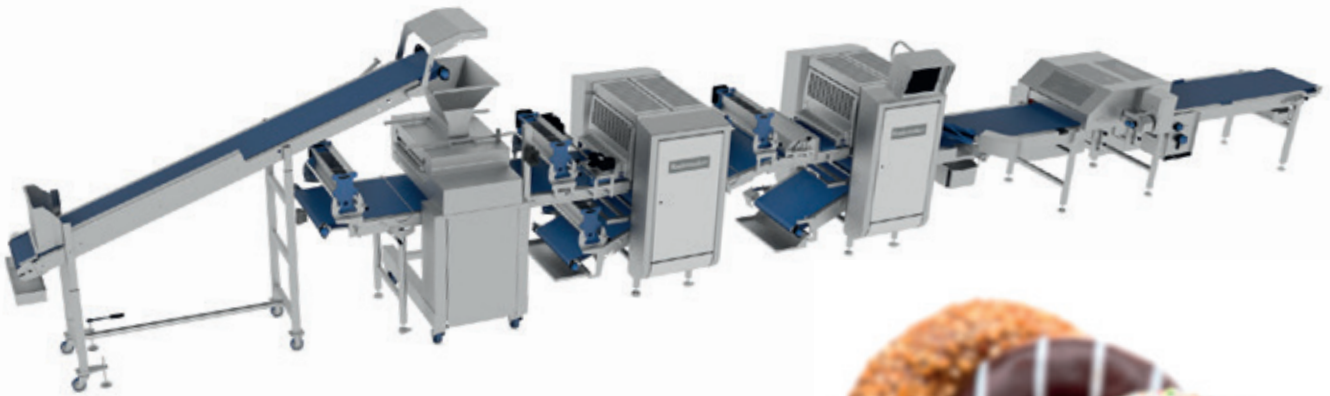

*Specialists in food processing equipment*

## *Donut line*

High volume and efficient Donut production

# Donut production line

## Specifications

Dough sheet: 600mm (width)  
Dough capacity: 450-750 kg/hour

## Added value

- ✓ Low stress technology
- ✓ Product flexibility
- ✓ Quick Changeover times
- ✓ Product shape control
- ✓ Robust design of the equipment
- ✓ Ease of sanitation
- ✓ Operator friendliness

### Making a donut with Rademaker's sheeting technology: efficient, hygienic and flexible!

Rademaker's Donut line is ideally suited for bakeries that need a high-quality and efficient production machine made of food graded materials. Moreover, thanks to the hygienic design, the donut line fulfils the strictest requirements of hygiene and the ability to clean the machine. The donut line is also easy to maintain and operate. Flexibility is offered, as all types of donuts can be produced with this production line.

### Different types of products possible

By adding additional tooling, it is also possible to produce various other types of dough products, like Long Johns, Cinnamon Rolls, Honeybuns, Bismarks, and many other shapes.

### Turn-key solutions

If so desired, Rademaker can take care of the complete production process by delivering a complete system integrated production solution. Together with the customer the Rademaker system integration department will develop a solution that suits the customer best, from mixing through packaging.
